

## **iSeries and AS/400 System Operations**

---

This course is designed for people who want to become proficient in basic system administration on the iSeries and AS/400 system. The curriculum covers everything from the basic system setup information through some of the more important areas that students need to understand in order to operate and manage an iSeries and AS/400 system. Using detailed, hands-on lab exercises students will obtain the information needed to make their job easier and will increase their comfort level working on these systems.

Duration:

- 5 Days, Instructor-led
