

Advanced iSeries and AS/400 System Operations

The primary focus of this class is system availability and disaster recovery. In hands-on lab exercises the student will learn the various types of disasters that can occur, their impact on your business, and the precautions to take to minimize and even eliminate the disaster and its effects. If you believe that backups alone are sufficient, then this class is for you.

Duration:

- 3 Days, Instructor-led

Prerequisite:

- Course 260: iSeries and AS/400 System Operations

Topics Include:

- Types of disasters
- Creating Auxiliary Storage Pools
