

## **iSeries and AS/400 Security Concepts**

---

This course, which is the same module as the final module in our Work Management course, provides a vital understanding of how security works, and covers not only the technical aspects of security with hands-on exercises, but also answers the “should” and “should not” questions that are oftentimes overlooked or ignored.

Duration:

- 1 Day, Instructor-led

Prerequisite:

- Course 220: iSeries and AS/400 System Operations

Topics Include:

- Security System Values
- User Profiles
- Group Profiles
- Authorization Lists
- Adopting Authority
- Software Vendor-Supplied Security
- Object Authority
- Security Auditing
- Tips & Techniques
