

Macromedia® Dreamweaver 4

This course is designed for those who want to learn how to create and design web sites using Macromedia® Dreamweaver 4. The curriculum focuses on how to use Dreamweaver 4 in a real work environment, where you need maximum efficiency from your Web development programs. The course illustrates how to make the most efficient use of Dreamweaver 4, enabling students to create the dynamic, interactive sites that today's sophisticated businesses require.

Students will learn the skills of adding text, graphics, and links to web pages, create complex tables in the new Layout view, add Flash text and buttons, work with menus and commands, along with handling user interactivity and site management.
