

CourseBuilder and Learning Site: Creating e-Learning

This course is for those who want to learn all aspects of the CourseBuilder and Learning Site extensions to Macromedia Dreamweaver. It covers how to add simple and complex interactivity to your e-learning web pages, using CourseBuilder, and how to add course navigation and architecture using Learning Site.

Students will learn how to create highly interactive quizzes, custom interactions, and track student data in Learning Site. They will discover the untapped uses of these extensions far beyond their out-of-the-box uses. Students will go beyond the beginner stage with an entire section of this course devoted to the flexibility and power of CourseBuilder's Action Manager.

Duration:

- 4 Days, Instructor-led

Prerequisite:

- Course 300: Macromedia® Dreamweaver 4

Topics Include:

- Introducing e-Learning with Dreamweaver
- Getting to Know CourseBuilder
- Multiple Choice and True/False Interactions
