

Using Microsoft® FrontPage 2000

This course is designed for people who want to learn how to create and manage web sites using Microsoft FrontPage 2000. It is packed with tips and real-world examples, and provides a thorough overview of the most-used features and functions of Microsoft FrontPage 2000.

Students will learn to build a Web site that integrates interactive multimedia elements, pre-built Office 2000 components such as spreadsheets or databases, and the very latest advances in Web technology. Using precise instructions and lots of examples, this course shows students how to harness the power of FrontPage and create state-of-the-art Web pages
