

## **Transact-SQL for Microsoft® SQL Server™ 2000**

---

This course provides students with the skills to write basic Transact-SQL Statements, for SQL Server 2000. With Transact-SQL you can create tables, add and delete data or query for information, within Microsoft SQL Server 2000.

Students will learn how to create basic to intermediate Transact-SQL statements, utilizing Microsoft SQL Server 2000 query tools.

Duration:

- 3 Days, Instructor-led

Prerequisite:

- Course 100: Relational Database Design and Concepts

Topics Include:

- Introduction to Transact-SQL
- Using Transact-SQL Querying Tools
- Retrieving Data
- Grouping and Summarizing Data
- Multi-Table Queries
- Working with Subqueries
- Modifying Data
- Querying Full-Text Indexes
- Introduction to Programming Objects
