

Domino R5 Advanced Application Development

After attending the Domino R5 Basic Application Development course and experience developing Domino applications, students are ready to refine basic application security and/or add workflow to a Domino application. In addition, students learn how to design more efficient business applications, which leverage the power of Domino.

Duration:

- 3 Days, Instructor-led

Prerequisite:

- Course 711: Domino R5 Basic Application Development

Topics Include:

- Domino Workflow Applications
- Review Basic Application Development features
- Creating Response Type Documents
- Creating Hierarchical Views
- Mail and Document Routing
- Advanced Notes Formula Language
- Importing and Exporting Domino Data
- Using @Functions to retrieve data
- Automating with Agents
- Advanced Access Control features
- Maintaining Applications
